SUMMARY

Final-year Information Technology student seeking a 20-week Software Testing/QA or Application Development internship starting August or September 2026. Hands-on experience developing web and database-driven applications across front-end and back-end, plus executing manual and functional testing to achieve zero critical bugs at deployment through academic projects. Detail-oriented and analytical, thrives on structured guidelines to deliver precise, measurable results, with strong teamwork and collaboration skills.

EDUCATION

UNIVERSITI KEBANGSAAN MALAYSIA (UKM)

Sept 2023–Present

Bachelor of Information Technology with Honours | CGPA: 3.58

KOLEJ MATRIKULASI PULAU PINANG

July 2021 – July 2023

Physical Science | CGPA: 3.42 | MUET: Band 4

AWARDS & HONORS

- **Dean's List Award (3 Semesters):** Awarded for achieving excellent academic standing in Semester 1 (2025/2026) and Semesters 1 & 2 (2024/2025).
- **Certificate of Appreciation (Treasurer):** Recognized by the club for outstanding financial management and leadership within the Programming Club (Session 2024/2025).

PROJECT EXPERIENCE

Portal UsahawanDigital (Final Year Project)

- Developed a Progressive Web Application (PWA) using HTML, CSS, and JavaScript with MVC and MPA architectures to digitize business management for micro-entrepreneurs.
- Architected a secure backend using Supabase for database management, with automated deployment to Vercel triggered by GitHub pushes.
- Engineered a core sales module enabling daily transaction tracking and automated PDF business report generation to streamline financial record-keeping for micro-entrepreneurs.
- Executed 17 functional test cases across 6 core modules (70.6% initial pass rate), performing root cause analysis to resolve failures including a service worker caching bug and Supabase data-sync errors, achieving zero critical bugs before final deployment.
- Validated portal usability through System Usability Scale (SUS) testing with 20 target users, achieving an 80.5/100 score (Grade B, "Best Imaginable" rating).

Noir Bloom Business Website (WordPress Project)

- Developed and managed a business website using WordPress, integrating Toyypay to streamline secure payment processing for customers.
- Customized layout and UI elements to enhance user navigation, resulting in a more professional and cohesive brand identity.

Odoo Inventory Management Project

- Configured and deployed Odoo ERP modules, specifically Sales, POS, Bill of Materials (BoM), and Accounting, to automate end-to-end business workflows.
- Optimized raw material consumption tracking and automated reordering rules, improving inventory accuracy and preventing material stockouts.

Smash Hub Ordering System (Web Programming Project)

- Developed a web-based inventory and transaction management system built using PHP, MySQL, and Bootstrap Framework for frontend responsiveness.
- Implemented user authentication and role-based access control to securely differentiate permissions and features between Administrators and generic Staff accounts.
- Conducted manual database verification via phpMyAdmin to test the integrity of backend CRUD operations, ensuring new transactions successfully populated across 4 core relational tables (Users, Products, Staff, and Customers).
- Integrated automated pagination and search functionalities using DataTables, optimizing interface loading speeds and improving user navigation efficiency during record filtering.

EXTRACURRICULAR ACTIVITIES

PROGRAMMING CLUB, FAKULTI TEKNOLOGI DAN SAINS MAKLUMAT, UKM

Student Advisor

Oct 2025 – July 2026

Provided technical mentorship to committee members and managed long-term activity planning.

Secretary | Escape Room Program

July 2025

- Authored comprehensive project proposals and managed the end-to-end documentation process, ensuring all “iSTAR” (UKM Student Activity System) requirements and faculty standards were met.
- Coordinated “backstage” technical units and program flows while managing participant engagement as a Game Facilitator.

Treasurer

Oct 2024-July 2025

- Managed club finances and budgets for various student-led programs.
- Served as the primary spokesperson during Faculty Induction Day, pitching the club’s mission to recruit new members.

Facilitator & Program Committee

Web Development Crash Course: Website Deployment

May 2024

- Guided participants in configuring XAMPP local servers and debugging HTML/CSS scripts using Sublime Text.

Bengkel Hour of Code

Dec 2023

- Facilitated Scratch sessions to teach core computational logic and coordinated the Gifts and Souvenirs unit.

SKILLS & LANGUAGES

Hard Skills :

- **Web Development:** HTML, CSS, JavaScript, PHP, WordPress
- **Mobile Development:** Kotlin, Firebase
- **Software Testing & QA:** Manual Testing, Functional Testing, API Testing Fundamentals (Postman)
- **ERP & Databases:** Odoo ERP, Supabase (PostgreSQL), MySQL, phpMyAdmin
- **Tools & Platforms:** Vercel, GitHub, VS Code, Red Hat Linux, Unity, AutoCAD (3D Product Design)
- **Productivity Tools:** Google Workspace, Microsoft Office (Word, Excel), Canva

Languages : English (Highly proficient), Malay (Native)

CERTIFICATIONS

March 2026	Participant, Introduction to ARM On-Demand Training Programme
March 2026	Red Hat System Administration I (RH124 – RHA) -Ver. 10
June 2026	Participant, ASEM Chip Start 2.0
June 2026	Red Hat System Administration II (RH134 – RHA) -Ver. 10
