PROFESSIONAL SUMMARY

Final-year Bachelor of Information Technology student with experience in web development, database management, and software testing through academic projects. Skilled in developing applications, troubleshooting technical issues, and performing functional testing. Adaptable and detail-oriented with strong problem-solving and teamwork skills, seeking an IT internship opportunity starting September 2026.

EDUCATION

Bachelor of Information Technology with Honours

Universiti Kebangsaan Malaysia | CGPA: 3.58

Sept 2023 – Present

Matriculation Programme - Physical Science

Kolej Matrikulasi Pulau Pinang | CGPA: 3.42 | MUET: Band 4

July 2021 – July 2023

PROJECT EXPERIENCE

Portal UsahawanDigital – Final Year Project

Progressive Web Application (PWA) Development

- Developed a Progressive Web Application (PWA) using HTML, CSS, and JavaScript based on MVC and MPA architectures to support digital business management for micro-entrepreneurs.
- Managed backend services using Supabase (PostgreSQL) and automated deployment through Vercel with GitHub integration.
- Developed sales management features including transaction tracking and automated PDF report generation to improve financial record-keeping.
- Conducted functional testing across 6 core modules using 17 test cases, resolving system issues and performing usability testing with 20 users, achieving an SUS score of 80.5/100.

Noir Bloom Business Website – WordPress Project

- Developed and managed a business website using WordPress with integrated ToyyibPay payment functionality.
- Customized website layouts and user interface elements to improve navigation and enhance overall user experience.

Odoo Inventory Management Project

- Configured Odoo ERP modules including Sales, Point of Sale (POS), Bill of Materials (BoM), and Accounting for business workflow automation.
- Implemented inventory tracking features and automated reordering rules to improve stock management accuracy.

Smash Hub Ordering System – Web Programming Project

- Developed a web-based inventory and transaction management system using PHP, MySQL, and Bootstrap.
- Implemented user authentication and role-based access control for Administrator and Staff accounts.
- Performed database testing and CRUD operation verification using phpMyAdmin to ensure data accuracy.
- Implemented custom search and pagination functionality using PHP and SQL to improve product browsing usability.

EXTRACURRICULAR ACTIVITIES

Programming Club, Faculty of Information Science and Technology, UKM

Student Advisor

Oct 2025 – July 2026

- Provided technical guidance and supported activity planning.
